Prerequisite

- Intel I5 Processor and above
- Minimum 4 GB RAM, 8 GB RAM Preferable
- Minimum 5 GB of HardDisk Space, 50 GB preferable
- Windows 7 and above
- Internet Information Service 7 and above
- DotNet Framework 4.5 and above
- SQL Server 2008 and above.

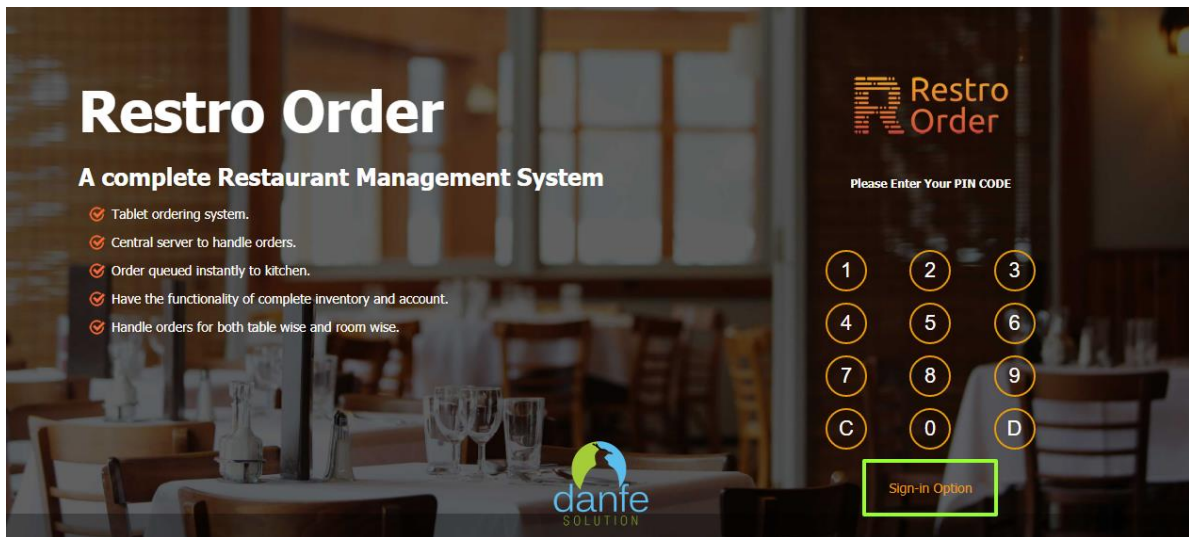

RestroOrder Architecture Diagram

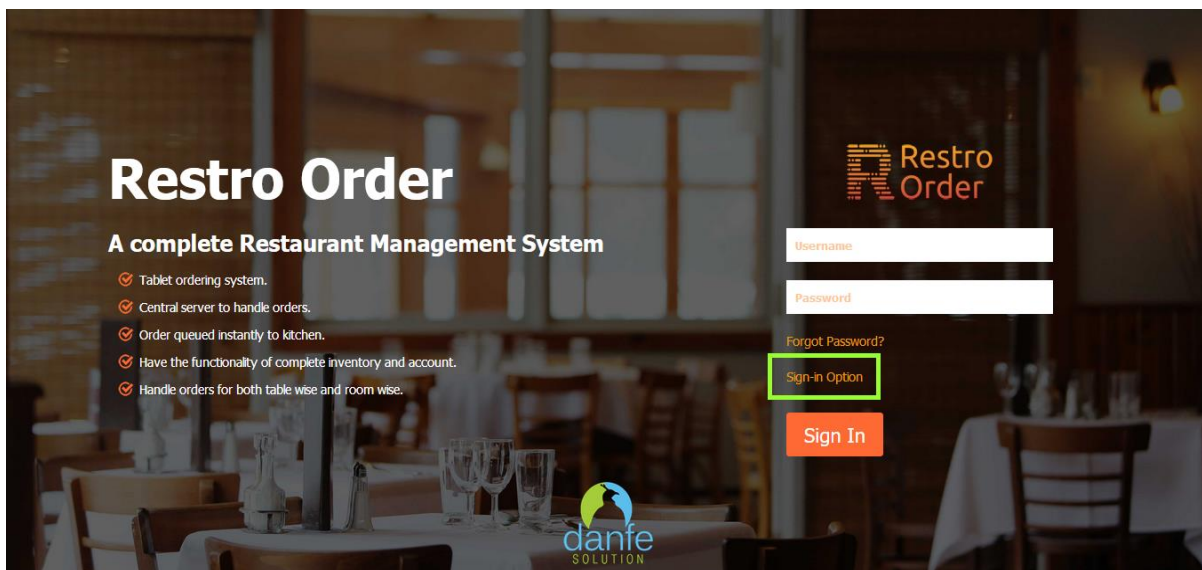

1. Login

In order to login, open a browser and give the web address in the address bar and enter. Following are the two ways to login into Restro Order:

- I. **Pin code:** Pin code is a set of number which users get while creating the account. Pin code could be simply inserted to login. Login could also be switched meaning different type of users could log in from the “sign-in option” button as highlighted in the picture below with green color.

- II. **Username and Password:** The other way is by entering the correct username and password and finally clicking on sign-in button in orange color as shown in the picture below.

2. Home Page

Once a user is logged in, home page could be previewed which looks something as shown in the picture below.

The screenshot displays the 'Restro Order' dashboard. On the left, there's a vertical menu with 'Garden' and 'Open' buttons. The main area features a table titled 'Occupied Table (10)' with columns for 'Room / Table', 'Check In', and 'Action'. The table lists 10 entries with their respective check-in times and available actions like 'Order', 'Pay', 'Cancel', 'Shift', and 'UnMerge'. A search bar is located at the top right of the table. On the far right, there's a sidebar with icons for 'Complimentary', 'Merge Tables', 'Unpaid Bills', 'Take Away', and 'Call Waiter'. The bottom left corner shows 'Powered By' with a logo.

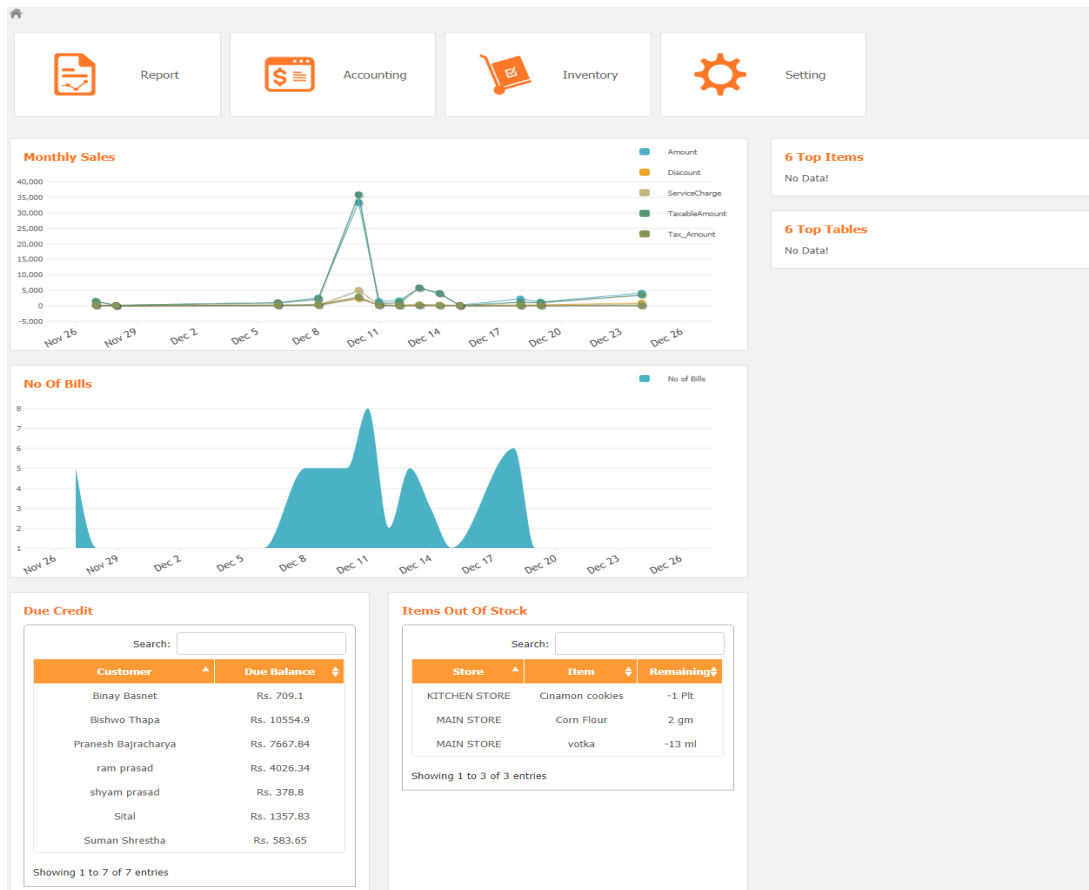

Room / Table	Check In	Action
Back Yard / BCY - 2	2/23/2018 1:48:13 PM	Order Pay Cancel Shift

Showing 1 to 10 of 10 entries

3. Admin Page (Dashboard)

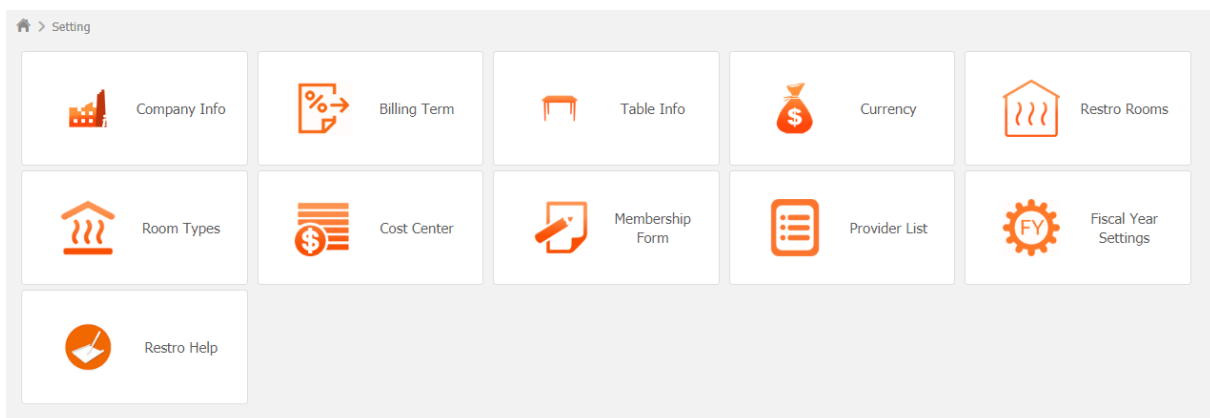

Dashboard is a control panel where an authorized user creates and manages the different users and modules. All the settings, inventory management, accounting, report generation, comparison and analyses could be done from dashboard. The picture below clearly shows what options are available under dashboard.

Additional information that is available on dashboard click are monthly sales and number of bill generated chart, customer due credit, items out of stock and top six items and tables of restaurant.

3.1 Setting

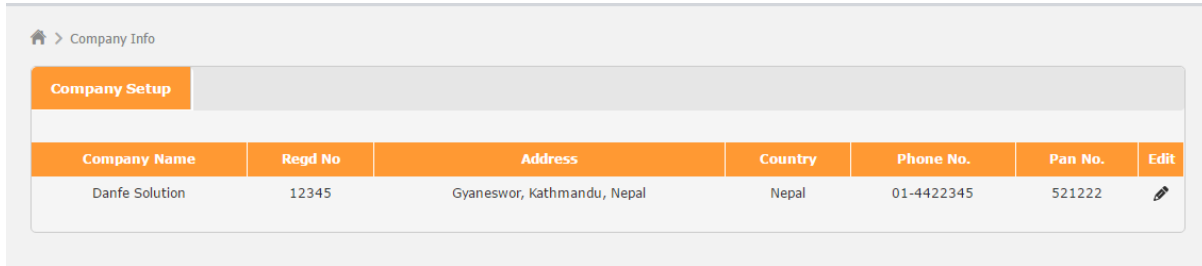

From here, the company settings are configured for instance details like its name, tables it contain and rooms available, billing term, cost center and so on. Picture illustrated below is a preview of options that a company could maintain.

3.1.1 Company Info

This module is a platform to keep detail information about the company. The only way of adding new information here is by modifying the existing information. The steps to modify the company's information are given below:

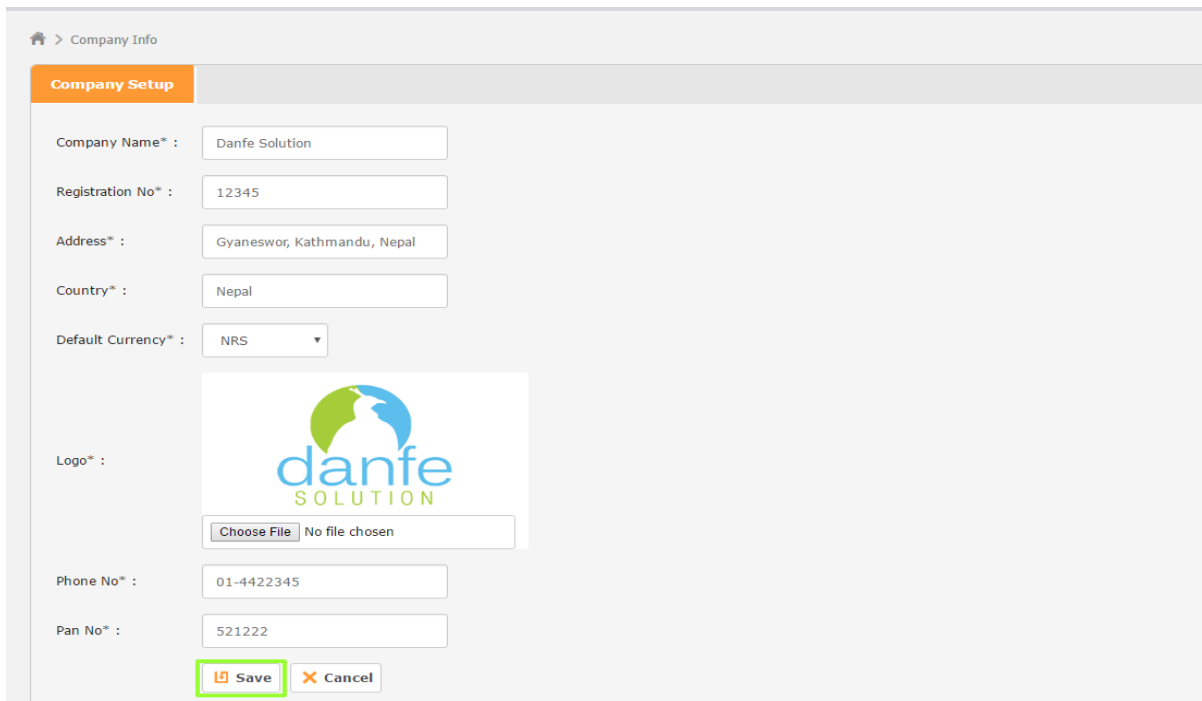

1. **Login** to backend page with an Administrator account
2. **Click** on Dashboard
3. **Click** on Company Info

The screenshot shows the 'Company Info' page with a breadcrumb trail 'Home > Company Info'. Below the breadcrumb is a 'Company Setup' tab. A table displays the following information:

Company Name	Regd No	Address	Country	Phone No.	Pan No.	Edit
Danfe Solution	12345	Gyaneswor, Kathmandu, Nepal	Nepal	01-4422345	521222	

4. **Click** on edit button
5. **Fill** the field with correct data
6. **Click** on save button

The screenshot shows the 'Company Info' page with a breadcrumb trail 'Home > Company Info'. Below the breadcrumb is a 'Company Setup' tab. The form contains the following fields:

- Company Name*: Danfe Solution
- Registration No*: 12345
- Address*: Gyaneswor, Kathmandu, Nepal
- Country*: Nepal
- Default Currency*: NRS
- Logo*: 
 Choose File No file chosen
- Phone No*: 01-4422345
- Pan No*: 521222

At the bottom, there are 'Save' and 'Cancel' buttons. The 'Save' button is highlighted with a green box.

3.1.2 Room Type

This section will allow creating, modifying and removing the room type in Restro Order.

User has to be admin to be able to add or edit or delete or update the room type so firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Room type module which will lead to page as shown below.

Fill the field with correct data and do not forget to save.

2. Edit: Click on edit button to modify the existing room type.
3. Delete: To remove existing room type click on delete button.

3.1.3 Restro Rooms

Similarly, this module helps in creating, modifying and removing the restro room.

User has to be admin to be able to add or edit or delete or update the restro room so firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Restro Room module.

Restro Rooms

Restro Room Name

Open2	Open		

Fill the field with correct data then save it.

2. Edit: Click on edit button to modify the existing Restro room.
3. Delete: To remove existing Restro room click on delete button.

3.1.4 Table Info

Similarly, this module helps in creating, modifying and removing the table info.

User has to be admin to be able to add or edit or delete or update the table info so firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Table Info module.

Table Info

Table Name

Show: 10 entries Search:

Table	Table Capacity	Room Name	Edit	Delete

Table* :

Is Table : ☒

Table Capacity :

Room Name :

Fill the field with correct data then save it.

2. Edit: Click on edit button to modify the existing table.
3. Delete: To remove the existing table, click on delete button.

3.1.5 Cost Center

There are few cost centers available already which could be easily modified by admin. To do so, Firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Cost Center module

Then, Click on the edit button and modify the field as highlighted in the picture below.

The screenshot shows the 'Cost Center' module in a web application. The top section, 'Cost Center Info', displays a table with the following data:

Cost Center Name	Number Of Counter	Default Printer	Discount	Edit
Kot	1	SLK-TL210	10.00	
Bar	1	SLK-TL210	0.00	
Bakery-Cafe	1	SLK-TL210	10.00	
Billing	1	SLK-TL210	0.00	

The 'Edit' button for the 'Kot' cost center is highlighted with a green box. Below the table is a form to edit the selected cost center. The form fields are:

- Cost center *: Kot
- Number of Counter *: 1
- Default Printer *: Xprinter XP-350BM #2
- Discount : 10.00
- Store : Kitchen Store

At the bottom of the form are 'Save' and 'Cancel' buttons.

Here, a printer should be selected so that print could be send to the relevant cost center. Likewise, store name should be compulsorily selected to maintain the stock or to deduct ingredient item from stock after sales.

3.1.6 Billing Term

This section constitutes of a list of billing terms including discount, service charge, and vat and so on which might be essential while billing. This module helps in creating, modifying and removing the billing terms.

User has to be admin to be able to add or edit or delete or update the billing terms so firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Billing Term module.

The screenshot shows the 'Billing Term' module in a web application. The top section, 'Billing Term', displays a table with the following data:

Bill Term	Sequence No	IsAdd	Rate	Edit	Delete
VAT	7	True	13.00		
Service Charge	1	True	10.00		
Extra Charge	2	True	0.00		

At the top left of the table is an 'Add' button with a plus icon.

1. Click on add button to add new billing term.

Setting > Billing Term

Billing Term

Name* :

Rate* :

Sequence No* : (Number for two Bill Term shouldn't be the same. Vat will always have highest sequence number.)

Description* :

Fill the fields with correct data then save it.

2. Edit: Click on edit button to modify the existing billing term.
3. Delete: To remove the existing billing term click on delete button.

3.1.7 Provider List

Similarly, this module helps in creating, modifying and removing the provider list.

This list will be displayed during bill pay when payment method such that cheque or swap card is selected.

Setting > Provider List

Swap Card Provider

Provider Name	Description	Edit	Delete
Standard Chartered	Test Description	Edit	Delete
Nepal Investment Bank	Nepal Investment	Edit	Delete
Rastra Banijaya Bank	Rastra Banijaya Bank	Edit	Delete

1. Click on add button to add new provider

Setting > Provider List

Swap Card Provider

Provider Name* :

Description :

Fill the field with correct data then save it.

2. Edit: Click on edit button to modify the existing provider.
3. Delete: To removing existing provider click on delete button.

3.1.8 Membership

Here, both customer and vendor could be added, also be edited, modified and removed.

Firstly, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Membership module.

The screenshot shows the 'Membership Form' dashboard. At the top, there is a breadcrumb trail: 'Setting > Membership Form'. Below this, there is a 'Membership Form' header. Under the header, there is a green box with a plus icon and the word 'Add', labeled with a green '1'. Below this, there are two tabs: 'CUSTOMER' and 'VENDOR'. The 'CUSTOMER' tab is selected. Below the tabs, there is a search bar and a 'Show 10 entries' dropdown. Below this, there is a table with the following columns: Name, Address, PAN, Card No., Occupation, Company, ContactNo., Discount(%), RMNG BAL, Total Paid, Edit, and Delete. The table contains one entry for 'Roman Khwaunju' with a Card No. of 989898 and a ContactNo. of 9849984998. The 'Edit' and 'Delete' buttons for this entry are highlighted with green boxes and labeled with green '2' and '3' respectively. At the bottom, there is a pagination bar showing 'Showing 1 to 1 of 1 entries' and buttons for 'Previous', '1', and 'Next'.

1. Click on add button to add a customer or vendor
Correct membership whether it is customer or vendor should be checked so that respective form would appear. The picture as below provides an idea for membership selection.

The screenshot shows the 'Membership Form' selection screen. At the top, there is a breadcrumb trail: 'Setting > Membership Form'. Below this, there is a 'Membership Form' header. Below the header, there is a 'Select' label followed by two radio buttons: 'Customer' and 'Vendor'. The 'Customer' radio button is selected and highlighted with a green box.

Below is a form that will appear if Customer was selected as membership.

The screenshot shows the 'Customer Membership Form'. At the top, there is a breadcrumb trail: 'Setting > Membership Form'. Below this, there is a 'Membership Form' header. Below the header, there is a 'Select' label followed by two radio buttons: 'Customer' and 'Vendor'. The 'Customer' radio button is selected and highlighted with a green box. Below this, there are various input fields for customer information: First Name, Last Name, Address, City, Country, Tel(Home), Tel(Work), Mobile, Email, Occupation, Company, Birthday, Anniversary, Card Number, Date Of Issue, Date Of Expiry, and Discount Percentage. The 'Save' and 'Cancel' buttons are at the bottom.

Similarly, below is a form that will appear if vendor was selected as membership

Home > Setting > Membership Form

Membership Form

Select : ☐ Customer ☒ Vendor

Name :

Address : City :

Country :

Tel(Work) : Mobile :

Email :

PAN :

Is VAT ? ☐

Finally click on save once the entire fields are filled.

3.1.9 Fiscal year Setting

This module helps to create and modify fiscal year. To create new fiscal year, click on add button and insert into the fields and save it. Similarly for modifying click on edit button and edit on necessary fields and save it.

Home > Setting > Fiscal Year Settings

Fiscal Year

Fiscal Year ID	Fiscal Year	Start Date	End Date	Is Active	Edit

3.1.10 Restro Help

Here, users could download the user manual.

3.2 Inventory

On clicking inventory, the following modules will appear. These are the modules or options that will track the whole inventory including item unit, item categories, item, combo pack, opening balance and more. Each of them is explained in detail in the points further.

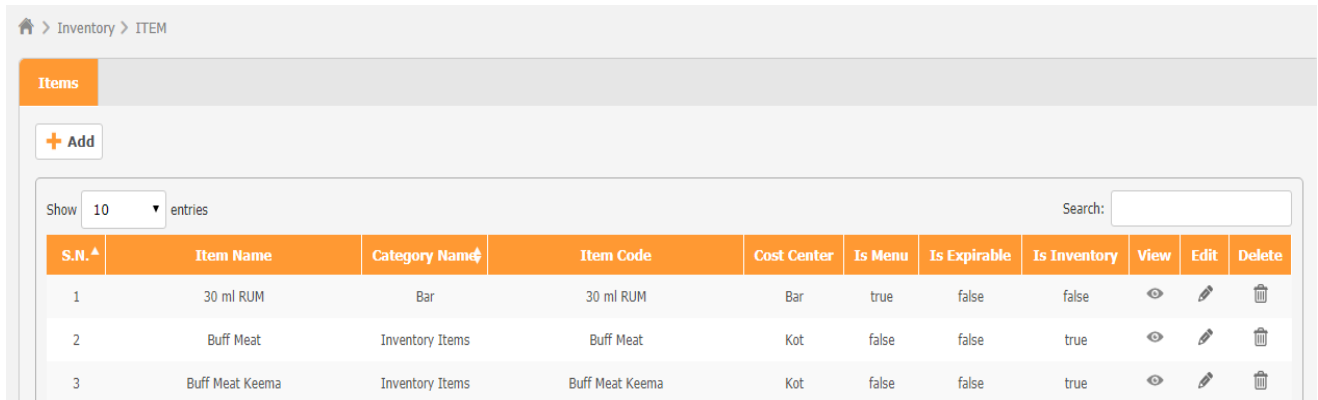

3.2.1 Item Unit

Units are required while buying and selling items for that, units should be added. Moreover, conversion unit could also be added however that should be standard units and could be converted up to two levels.

This section guides to create, modify and remove the units in Restro Order.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Unit module to get some sort of preview as shown in the picture

After that, click on **Add** button to add units, a form will appear. As shown below in the picture.

Inventory > Item Unit

Units Conversion

Unit Description :

Symbol :

Units are added under unit page as shown above.

Fill the fields with correct data.

Finally **save** to save the new unit.

For modification of existing units, Click on edit button such that pencil icon on the second last column of a row in which changes are to be made, make necessary changes and finally click on save.

To remove existing unit click on delete button on the last column of the row on which delete operation is to be done.

For unit conversion, click on conversion page, only standard units like gm & kg, l & ml could be added.

The form will look something like the picture below:

Inventory > Item Unit

Units Conversion

First Unit :

Conversion :

Second Unit :

Fill the fields with correct data and **save**.

Click on edit button to modify existing conversion unit. After that make necessary changes and **save**

For removing existing conversion unit click on delete button.

3.2.2 Item Category

This module allows creating, modifying and removing the Item Category in Restro Order.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Item Category module.

Inventory > Item Categories

Categories

Show 10 entries Search:

SN	Category Name	Category Code	CostCentre	Edit	Delete
1	Inventory Items	Inventory Items	Kot	Edit	Delete
2	Starter	Starter	Kot	Edit	Delete
3	Main Course	Main Course	Kot	Edit	Delete

To add new item category, click on **Add** button, a form will appear as shown in the picture below.

The screenshot shows a web form titled 'Categories' under the 'Inventory > Item Categories' path. The form contains the following elements:

- Parent Categories :** A dropdown menu with 'Root' selected.
- Category Name* :** A text input field.
- Category Code :** A text input field.
- Is Menu? :** A checkbox that is checked.
- Image :** A large empty box for an image, with a 'Choose File' button and 'No file chosen' text below it.
- IsActive :** A checkbox that is checked.
- Is Inventory Item :** A checkbox that is unchecked.
- Buttons:** 'Save' and 'Cancel' buttons at the bottom.

Fill the fields with correct data

Click on edit button to modify the existing item category, make necessary changes and save.

To remove existing item category click on delete button.

3.2.3 Item

This module allows creating, modifying and removing the the item in Restro Order.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Item module. General preview is shown below in the picture.

The screenshot shows the 'Items' module under the 'Inventory > ITEM' path. It includes an '+ Add' button, a 'Show 10 entries' dropdown, and a search bar. Below is a table of items:

S.N. ^	Item Name	Category Name	Item Code	Cost Center	Is Menu	Is Expirable	Is Inventory	View	Edit	Delete
1	30 ml RUM	Bar	30 ml RUM	Bar	true	false	false			
2	Buff Meat	Inventory Items	Buff Meat	Kot	false	false	true			
3	Buff Meat Keema	Inventory Items	Buff Meat Keema	Kot	false	false	true			

To add a new item, click on **Add** button, a form will appear.

For adding ingredient item,

Ingredients are usually not in the menu, they are inventory so it could be regarded as inventory item. If the item to be inserted is an inventory meaning that it is something that is purchased then “is inventory item” should be marked. For instance if a restaurant buys a frozen momo then momos are inventory item but if it produces itself then flour, kima, oil would be the inventory items.

For adding menu item,

Menu items are those items which are listed in the menu for instance if item to be inserted is chips chilly then it would be a menu item as it will be visible in the menu. For such items check box has to be marked. If potato is an item to be inserted then check box is left unmarked as it is not menu item. Sometimes an item could be menu as well as inventory item. In that case we mark both the boxes for example beer, it is the inventory item as well as menu item.

The screenshot shows the 'ITEM' form in the Restro Order system. The form is divided into several sections:

- Category Name ***: A dropdown menu with '-Select-' selected.
- Item Name ***: A text input field.
- Item Code**: A text input field.
- Image**: A large text input field for the item's image.
- Is Menu**: A checkbox that is checked (highlighted with a green box).
- Is Expirable**: A checkbox that is unchecked.
- Is Inventory Item**: A checkbox that is unchecked.
- Cost Center ***: A dropdown menu with 'Kot' selected.
- Is Active**: A checkbox that is checked.
- Small unit ***: A dropdown menu with '-Select-' selected.
- Sales Rate(*Excluded Tax)**: A text input field with '0' entered.
- Valid From**: A text input field with '02/26/2018' entered.
- Extra Items**: A section with checkboxes for 'Cheese(Rs. 25)', 'Butter(Rs. 15)', 'Chilly(Rs. 0)', and 'Spice(Rs. 10)'. The 'Chilly(Rs. 0)' checkbox is checked.
- Ingredient Entry**: A table with columns 'Ingredient', 'Quantity', and 'Action'. The 'Ingredient' column has a text input field, and the 'Quantity' column has a text input field. The 'Action' column has a '+' button.
- Buttons**: 'Save' (highlighted with a green box) and 'Cancel' buttons.

Fill the field with correct data.

Click on edit button to modify in existing item.

For removing existing item click on delete button.

3.2.4 Extra Item

Extra item is like topping that contains certain cost. It could be added, modified and even removed.

For that, click on inventory

Then on extra items

Provide the necessary information and save as shown below.

3.2.5 Combo Pack

This module allows creating and removing combo pack in Restro Order. Here you can combine the items. You can also remove the combo packs once the offer is over else it will be disabled automatically after date expires.

The screenshot shows the 'Inventory > Combo Pack' page. At the top, there is a '+ Add' button. Below it, a search bar and a 'Show 10 entries' dropdown are visible. A table lists the existing combo packs with columns: SN, Name, Combo Code, Start Date, End Date, Sales Rate, Sales Cost, IsActive, and Action. One entry is shown: SN 1, Name 'New Year Combo Offer', Combo Code 001, Start Date 2018.02.26, End Date 2018.03.01, Sales Rate 450, Sales Cost 500, and IsActive 'true'. At the bottom, it says 'Showing 1 to 1 of 1 entries' and has 'Previous', '1', and 'Next' navigation buttons.

The screenshot shows the 'Inventory > Combo Pack' form. It includes fields for Name*, Image (with an Upload button), Start Date* (2018/02/26), End Date* (2018/03/01), Cost Center* (-Select-), and ComboCode*. There is also an IsActive checkbox which is checked. Below these fields is a table with columns: Item Name, Rate, Qty, Amount, and Action. The table is currently empty, with an '+ Add' button at the bottom right. At the bottom of the form, there are fields for Items Sales Cost and Sales Price*, and a 'Save' button which is highlighted with a green box.

3.2.6 Store

This section allows creating the store in Restro Order. First, **Login** to backend page with an Administrator account. Secondly, **go to** the dashboard and click into Store module. After that click on **Add** button, a form will appear.

The screenshot shows the 'Inventory > Store' page. At the top, there is a 'ROI Store' tab. Below it, there are fields for Store Name and Parent Store (set to 'Root'). A 'Save' button is highlighted with a green box. Below the form fields, there is a table with columns: Store Name, Edit, and Delete. The table lists three stores: Main Store, Kitchen Store, and Bar Store. At the bottom, it says 'Showing 1 to 3 of 3 entries' and has 'Previous', '1', and 'Next' navigation buttons.

Fill the field with correct data.

Click on edit button to modify existing store.
To remove existing store, click on delete button.

3.2.7 Opening Balance

Opening balance is inserted once while starting up with the software. It means the opening quantity or the opening stock the company posses already in the store.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Restro Open Balance module.

The screenshot shows the 'Opening Balance' module interface. At the top, there is a breadcrumb trail: 'Inventory > Opening Balance'. Below this is a header bar with the title 'Opening Balance' and an '+ Add' button. A search bar is located on the right. Below the search bar is a table with the following columns: 'Item Name', 'Store Name', 'Opening Balance', and 'Delete'. The table contains one row with the data: 'Buff Meat Keema', 'Main Store', '500 (gm)', and a delete icon.

After that click on **Add** button, a form will be displayed.

The screenshot shows the 'Opening Balance' form. It has a breadcrumb trail: 'Inventory > Opening Balance'. The form contains three input fields: 'Item :' with the value 'Flour', 'Store :' with a dropdown menu showing 'Main Store', and 'Opening Balance :' with the value '10' and a unit dropdown menu showing 'kg'. At the bottom, there are two buttons: 'SAVE' (highlighted with a green box) and 'Cancel'.

Fill the field with correct data.

3.2.8 Purchase

This section allows creating the purchase order in Restro Order.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Purchase Order module.

The screenshot shows the 'Purchase' module interface. At the top, there is a breadcrumb trail: 'Inventory > Purchase'. Below this is a header bar with the title 'Purchase' and an '+ Add' button. A search bar is located on the right. Below the search bar is a table with the following columns: 'S.N.', 'Purchase Number', 'Vendor Name', 'Remarks', and 'Delete'. The table contains two rows with the data: '1.', 'PO_1', and '2.', 'PO_2'.

After that click on **Add** button, a form will appear.

Save

Save the data.

3.2.10 Issue

This section allows adding items that have been issued from different stores.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Issue module.

After that click on **Add** button, a form will appear.

The screenshot shows the 'Issue' module interface. At the top, there's a breadcrumb 'Inventory > Issue'. Below it, a tab labeled 'Issue' is active. The form includes two dropdown menus: 'Issued To Store' (set to 'Kitchen Store') and 'Issued From Store' (set to 'Main Store'). Below these are input fields for 'Item' (empty), 'Used Unit' (set to 'gm'), and 'Qty' (empty). A green box highlights the 'Add' button next to the 'Qty' field. Below the form is a table with columns: 'Item Name', 'Unit', 'Quantity', 'Edit', and 'Delete'. The table contains one row with 'Flour' as the item name, 'gm' as the unit, and '100' as the quantity. The 'Edit' and 'Delete' buttons for this row are represented by a pencil and trash icon respectively. At the bottom left, a green box highlights the 'Save' button.

Fill the field with correct data.

Click on edit button to modify existing item.

To remove item, click on delete button.

3.2.11 Adjustment

This section allows creating the adjustment.

First, **Login** to backend page with an Administrator account.

Secondly, **go to** the dashboard and click into Adjustment module.

After that click on **Add** button, a form will be displayed.

For adding types,

The screenshot shows the 'Adjustment' module interface. At the top, there's a breadcrumb 'Inventory > Adjustment'. Below it, a tab labeled 'Adjustment' is active, and a sub-tab labeled 'Types' is highlighted with a green box. The form includes a 'Type Name' field with the value 'Expired' and an 'Is Active' checkbox which is unchecked. A green box highlights the 'Save' button at the bottom.

For adding adjustment,

Inventory > Adjustment

Adjustment Types

Store : Main Store FY : 74/75

2 Home Page

Home page is the main page of a Restro Order which gives detailed information on its owner and provides links to its other parts. In this page you can see two bar i.e. navigation bar and side menu bar.

1. Navigation Bar: It is a row of links on Restro Order that allows users to move another page of the Restro Order without scrolling. Here you can move to different pages such as Kitchen order, Bar order, Ordered item Pick other list.
2. Dashboard: It will direct to admin page.
3. User setting: Here you can view user detail and also can logout from here.
4. Side Menu Bar: It is a column of links that leads you to the rooms which contains tables. Here you can move to different room type from where you can order items.

5. Reserved Tables: Here, occupied table are shown which in red color.

- Right side bar: Here you can see different tab such as Complimentary(for providing complimentary items to customer), Merge Table(for merging two or more tables), Unpaid Bills(bill not cleared are paid from here), Take way, Call waiter(for calling available waiter).

3 How to Order Item

Here are some steps for ordering item which is given below:

For this, first, **Login** with an Administrator account.

Secondly, **go to** the side menu bar and select the room type i.e. Open.

After that select resto room and table.

After selecting table click on order now, you will lead to Menu page i.e.

The screenshot displays the Restro Order system interface. On the left, the 'Restro Menu' is visible with categories like Starter, Main Course, Pizza, Bakery, Bar, and Momo. The 'Main Menus' section shows 'Momo Items' and 'Chicken MOMO Items'. On the right, the 'Order List' is shown with columns for S.N., Items, Quantity, and Extra. The 'Ordered Items' tab is selected, showing a list of items ordered for Room Name: Hall and Table Name: HT - 1. The items include Hot Chocolate, Ice Cream Cappuccino, Red wine 30ml, Tuborg Beer, Buff Steam MOMO, and Chicken C. MOMO. The quantity for each item is displayed, and there are buttons to increase or decrease the quantity. There are also buttons for 'Send Order' and 'Cancel Order'.

S.N.	Items	Quantity	Extra
1	Hot Chocolate	1	
2	Ice Cream Cappuccino	1	
3	Red wine 30ml	1	
4	Tuborg Beer	1	
5	Buff Steam MOMO	2	
6	Chicken C. MOMO	4	

- Restro Combo: Combo items can be order from here.
- Search: Item can be search and ordered.
- Category items: If you click on category, it will display sub- category or items according you have inserted item in inventory.
- Sub-category item: If you click on sub-category, it will display sub- category or items according you have inserted item in inventory.
*Note: There will not be price in category and sub-category.
- Items: Select the item that you like to order which will be visible in right side order list. Final product contain price.
*Note: You can insert item up to 4th level. In this given figure item is displayed in 3rd level.
- Status: This is status of the item you have send ordered I.e. ordered or queued item, in-progress item and completed item.
- Quantity: You can increase or decrease the number of items you selected.
- Extra: If you like to add note like extra spicy or less salt.

9. Send Order: The item you selected is ordered by clicking over here.
 10. Cancel Order: If you don't want to order click on this button.
- Your ordered item will be saving successfully.

Then click on the pay button of the table of which you want to generate bill.
